CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

## Spoon Feeding Quadratic Equation

## Simplified Knowledge Management Classes Bangalore

My name is Subhashish Chattopadhyay. I have been teaching for IIT-JEE, Various International Exams ( such as IMO [ International Mathematics Olympiad ], IPhO [ International Physics Olympiad ], IChO [ International Chemistry Olympiad ] ), IGCSE ( IB ), CBSE, I.Sc, Indian State Board exams such as WB-Board, Karnataka PU-II etc since 1989. As I write this book in 2016, it is my 25 th year of teaching. I was a Visiting Professor to BARC Mankhurd, Chembur, Mumbai, Homi Bhabha Centre for Science Education ( HBCSE ) Physics Olympics camp BARC Campus.

And also of

## IACT (Indian Association of Chemistry Teachers )

The selection for National Camp ( for Official Science Olympiads - Physics, Chemistry, Biology, Astronomy ) happens in the following steps ....

1 ) NSEP ( National Standard Exam in Physics ) and NSEC ( National Standard Exam in Chemistry ) held around 24 rth November. Approx 35,000 students appear for these exams every year. The exam fees is Rs 100 each. Since 1998 the IIT JEE toppers have been topping these exams and they get to know their rank / performance ahead of others.

2 ) INPhO ( Indian National Physics Olympiad ) and INChO ( Indian National Chemistry Olympiad ). Around 300 students in each subject are allowed to take these exams. Students coming from outside cities are paid fair from the Govt of India.

3 ) The Top 35 students of each subject are invited at HBCSE ( Homi Bhabha Center for Science Education ) Mankhurd, near Chembur, BARC, Mumbai. After a 2-3 weeks camp the top 5 are selected to represent India. The flight tickets and many other expenses are taken care by Govt of India.

Since last 50 years there has been no dearth of "Good Books". Those who are interested in studies have been always doing well. This e-Book does not intend to replace any standard text book. These topics are very old and already standardized.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

## There are 3 kinds of Text Books

- The thin Books - Good students who want more details are not happy with these. Average students who need more examples are not happy with these. Most students who want to "Cram" quickly and pass somehow find the thin books "good" as they have to read less !!
- The Thick Books - Most students do not like these, as they want to read as less as possible. Average students are "busy" with many other things and have no time to read all these.
- The Average sized Books - Good students do not get all details in any one book. Most bad students do not want to read books of "this much thickness" also !!

We know there can be no shoe that's fits in all.

Printed books are not e-Books! Can't be downloaded and kept in hard-disc for reading "later"

So if you read this book later, you will get all kinds of examples in a single place. This becomes a very good "Reference Material". I sincerely wish that all find this "very useful".

Students who do not practice lots of problems, do not do well. The rules of "doing well" had never changed Will never change!

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

After 2016 CBSE Mathematics exam, lots of students complained that the paper was tough!

## CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses

 Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other examsIn 2015 also the same complain was there by many students

## CBSE Class 12 exam: Issue of tough maths paper raised in Parliament

A senior Congress member on Thursday raised the issue of the tough mathematics question paper in the ongoing CBSE board examinations and asked the government to consider the issue "seriously".

Last Updated: Thursday, March 19, 2015-14:41

New Delhi: A senior Congress member on Thursday raised the issue of the tough mathematics question paper in the ongoing CBSE board examinations and asked the government to consider the issue "seriously".

[^0]
## CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses

 Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other examsIn March 2016, students of Karnataka PU-II also complained the same, regarding standard 12 ( PU-II Mathematics Exam ). Even though the Math Paper was identical to previous year, most students had not even solved the 2015 Question Paper.

These complains are not new. In fact since last 40 years, ( since my childhood ), I always see this; every year the same setback, same complain!

In this e-Book I am trying to solve this problem. Those students who practice can learn.
No one can help those who are not studying, or practicing.

## A very polite request :

I wish these e-Books are read only by Boys and Men. Girls and Women, better read something else; learn from somewhere else.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

## Preface

We all know that in the species "Homo Sapiens ", males are bigger than females. The reasons are explained in standard 10, or 11 ( high school ) Biology texts. This shapes or size, influences all of our culture. Before we recall / understand the reasons once again, let us see some random examples of the influence

Random-1
If there is a Road rage, then who all fight ? ( generally ? ). Imagine two cars driven by adult drivers. Each car has a woman of similar age as that of the Man. The cars " touch " or " some issue happens". Who all comes out and fights? Who all are most probable to drive the cars ?

( Men are eager to fight, eager to rule, eager for war. Men want to drive. Men want to win )
Random-2
Heavy metal music artists are all Men. Metallica, Black Sabbath, Motley Crue, Megadeth, Motorhead, AC/DC, Deep Purple, Slayer, Guns \& Roses, Led Zeppelin, Aerosmith ..... the list can be in thousands. All these are grown-up Boys, known as Men.

( Men strive for perfection. Men are eager to excel. Men work hard. Men want to win. )

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses
Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Random-3
Apart from Marie Curie, only one more woman got Nobel Prize in Physics. ( Maria Goeppert Mayer - 1963 ). So, ... almost all are men.

( Men want to excel. Men strive for perfection. Men want to win. Men work hard. Men do better than women. )

Random-4
The best Tabla Players are all Men.

( Men want to excel. Men strive for perfection. Men want to win. Men work hard. Men do better than women. )

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Random-5
History is all about, which Kings ruled. Kings, their men, and Soldiers went for wars. History is all about wars, fights, and killings by men.

Boys start fighting from school days. Girls do not fight like this

( Men are eager to fight, eager to rule, eager for war. Men want to drive. Men want to win. )

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Random-6
The highest award in Mathematics, the " Fields Medal " is around since decades. Till date only one woman could get that. ( Maryam Mirzakhani - 2014 ). So, ... almost all are men.

( Men want to excel. Men strive for perfection. Men want to win. Men work hard. Men do better than women. )

## Random-7

Actor is a gender neutral word. Could the movie like " Top Gun " be made with Female actors ? The best pilots, astronauts, Fighters are all Men.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Random-8
In my childhood had seen a movie named " The Tower in Inferno ". In the movie when the tall tower is in fire, women were being saved first, as only one lift was working....

Many decades later another movie is made. A box office hit. " The Titanic ". In this also .... As the ship is sinking women are being saved. Men are disposable. Men may get their turn later...

Movies are not training programs. Movies do not teach people what to do, or not to do. Movies only reflect the prevalent culture. Men are disposable, is the culture in the society. Knowingly, unknowingly, the culture is depicted in Movies, Theaters, Stories, Poems, Rituals, etc. I or you can't write a story, or make a movie in which after a minor car accident the Male passengers keep seating in the back seat, while the both the women drivers come out of the car and start fighting very bitterly on the road. There has been no story in this world, or no movie made, where after an accident or calamity, Men are being helped for safety first, and women are told to wait.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Random-9
Artists generally follow the prevalent culture of the Society. In paintings, sculptures, stories, poems, movies, cartoon, Caricatures, knowingly / unknowingly, " the prevalent Reality " is depicted. The opposite will not go well with people. If deliberately " the opposite " is shown then it may only become a special art, considered as a special mockery.

## Random - 10

Men go to "girl / woman's house" to marry / win, and bring her to his home. That is a sort of winning her. When a boy gets a " Girl-Friend ", generally he and his friends consider that as an achievement. The boy who " got / won " a girl-friend feels proud. His male friends feel, jealous, competitive and envious. Millions of stories have been written on these themes. Lakhs of movies show this. Boys / Men go for " bike race ", or say " Car Race ", where the winner " gets " the most beautiful girl of the college.

( Men want to excel. Men are eager to fight, eager to rule, eager for war. Men want to drive. Men want to win. )

Prithviraj Chauhan ‘ went ` to " pickup " or " abduct " or " win" or " bring " his love. There was a Hindi movie ( hit ) song ... " Pasand ho jaye, to ghar se utha laye ". It is not other way round. Girls do not go to Boy's house or man's house to marry. Nor the girls go in a gang to " pick-up " the boy / man and bring him to their home / place / den.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Random-11
Rich people; often are very hard working. Successful business men, establish their business ( empire ), amass lot of wealth, with lot of difficulty. Lots of sacrifice, lots of hard work, gets into this. Rich people's wives had no contribution in this wealth creation. Women are smart, and successful upto the extent to choose the right/rich man to marry. So generally what happens in case of Divorces ? Search the net on " most costly divorces " and you will know. The women; ( who had no contribution at all, in setting up the business / empire ), often gets in Billions, or several Millions in divorce settlements.

## Number 1

Rupert \& Anna Murdoch -- \$1.7 billion
One of the richest men in the world, Rupert Murdoch developed his worldwide media empire when he inherited his father's Australian newspaper in 1952 . He married Anna Murdoch in the '60s and they remained together for 32 years, springing off three children.

They split amicably in 1998 but soon Rupert forced Anna off the board of News Corp and the gloves came off. The divorce was finalized in June 1999 when Rupert agreed to let his ex-wife leave with $\$ 1.7$ billion worth of his assets, $\$ 110$ million of it in cash. Seventeen days later, Rupert married Wendi Deng. one of his employees.

## Ted Danson \& Casey Coates -\$30 million

Ted Danson's claim to fame is undoubtedly his decade-long stint as Sam Malone on NBC's celebrated sitcom Cheers. While he did other TV shows and movies, he will always be known as the bartender of that place where everybody knows your name. He met his future first bride Casey, a designer, in 1976 while doing Erhard Seminars Training.

Ten years his senior, she suffered a paralyzing stroke while giving birth to their first child in 1979. In order to nurse her back to health, Danson took a break from acting for six months. But after two children and 15 years of marriage, the infatuation fell to pieces. Danson had started seeing Whoopi Goldberg while filming the comedy, Made in America and this precipitated the 1992 divorce. Casey got $\$ 30$ million for her trouble.

See http://skmclasses.kinja.com/save-the-male-1761788732
It was Boys and Men, who brought the girls / women home. The Laws are biased, completely favoring women. The men are paying for their own mistakes.

See https://zookeepersblog.wordpress.com/biased-laws/
( Man brings the Woman home. When she leaves, takes away her share of big fortune! )
Random - 12
A standardized test of Intelligence will never be possible. It never happened before, nor ever will happen in future; where the IQ test results will be acceptable by all. In the net there are thousands of charts which show that the intelligence scores of girls / women are lesser. Debates of Trillion words, does not improve performance of Girls.

[^2]CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

I am not wasting a single second debating or discussing with anyone, on this. I am simply accepting ALL the results. IQ is only one of the variables which is required for success in life. Thousands of books have been written on " Networking Skills ", EQ ( Emotional Quotient ), Drive, Dedication, Focus, " Tenacity towards the end goal "... etc. In each criteria, and in all together, women (in general ) do far worse than men. Bangalore is known as "..... capital of India ". [ Fill in the blanks ]. The blanks are generally filled as "Software Capital ", " IT Capital ", " Startup Capital ", etc. I am member in several startup eco-systems / groups. I have attended hundreds of meetings, regarding " technology startups ", or " idea startups ". These meetings have very few women. Starting up new companies are all " Men's Game " / " Men's business ". Only in Divorce settlements women will take their goodies, due to Biased laws. There is no dedication, towards wealth creation, by women.

Random-13
Many men, as fathers, very unfortunately treat their daughters as " Princess ". Every " nonperforming " woman / wife was " princess daughter " of some loving father. Pampering the girls, in name of " equal opportunity ", or " women empowerment ", have led to nothing.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

See http://skmclasses.kinja.com/progressively-daughters-become-monsters-1764484338
See http://skmclasses.kinja.com/vivacious-vixens-1764483974
There can be thousands of more such random examples, where " Bigger Shape / size " of males have influenced our culture, our Society. Let us recall the reasons, that we already learned in standard 10-11, Biology text Books. In humans, women have a long gestation period, and also spends many years ( almost a decade ) to grow, nourish, and stabilize the child. ( Million years of habit ) Due to survival instinct Males want to inseminate. Boys and Men fight for the " facility ( of womb + care ) " the girl / woman may provide. Bigger size for males, has a winning advantage. Whoever wins, gets the " woman / facility ". The male who is of " Bigger Size ", has an advantage to win.... Leading to Natural selection over millions of years. In general " Bigger Males "; the " fighting instinct " in men; have led to wars, and solving tough problems ( Mathematics, Physics, Technology, startups of new businesses, Wealth creation, Unreasonable attempts to make things [ such as planes ], Hard work .... )

So let us see the IIT-JEE results of girls. Statistics of several years show that there are around 17, ( or less than 20 ) girls in top 1000 ranks, at all India level. Some people will yet not understand the performance, till it is said that ... year after year we have around 980 boys in top 1000 ranks. Generally we see only 4 to 5 girls in top 500 . In last 50 years not once any girl topped in IIT-JEE advanced. Forget about Single digit ranks, double digit ranks by girls have been extremely rare. It is all about " good boys ", " hard working ", " focused ", "Belesprit " boys.

In 2015, Only $2.6 \%$ of total candidates who qualified are girls ( upto around 12,000 rank ). while $20 \%$ of the Boys, amongst all candidates qualified. The Total number of students who appeared for the exam were around 1.4 million for IIT-JEE main. Subsequently 1.2 lakh ( around 120 thousands ) appeared for IIT-JEE advanced.

IIT-JEE results and analysis, of many years is given at https://zookeepersblog.wordpress.com/iit-jee-iseet-main-and-advanced-results/

In Bangalore it is rare to see a girl with rank better than 1000 in IIT-JEE advanced. We hardly see 6-7 boys with rank better than 1000. Hardly 2-3 boys get a rank better than 500 .

## Spoon Feeding Series - Quadratic Equations

## Before we discuss Quadratic Equations, we need to various concepts of Graphs

The student must be very good at Graphs of Various kinds of functions; to do well in Continuity, Differentiability, Area, Volume problems. Some limit problems also require concepts of Functions and Graphs. The graphs will not be given in the Questions. In case of Area problems, the student has to draw the graphs quickly, largely to scale; get the intersection points, and then plan for a piece-wise strategy to integrate and find the area.

Let us review the various graphs
$y=m x$ will be a straight line passing through the origin. Positive $m$ will make the line move upwards as we move in positive $x$ i.e. towards right.

$$
\begin{array}{l|l}
\text { plot } & y=2 x
\end{array}
$$

This is graph of $y=2 x \quad$ Don't get foxed by the angle being almost $45^{\circ}$ The scales in $y$-axis and $x$-axis are not same. If we compare two graphs then it becomes more clear.

$$
\begin{array}{l|l}
\text { plot } & y=2 x \\
y=6 x
\end{array}
$$

In this figure also scales of $x$-axis and $y$-axis are not same. But $y=6 x$ has to be steeper than $y$ $=2 x$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\begin{array}{l|l|}
\hline \text { plot } & y=3 x \\
& y=-5 x
\end{array}
$$

$-3 x$
This is $y=3 x$ and $y=-5 x$ graphs. For $m=-5$ the line
moves down

For $y=m x+c$ the $c$ becomes the intercept in the $y$ axis
So $y=3 x-4$ will look like

$$
\text { plot } \quad y=3 x-4
$$

If $c$ is a positive number then the intercept in $y$-axis will be on upper ( positive ) side.
Graphs of $y=2 x+3$ and $y=4 x+5$ will be

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\begin{array}{l|l}
\text { plot } & y=2 x+3 \\
& y=4 x+5
\end{array}
$$

Again scales in $x$-axis and $y$-axis are different. But point made. See how the graphs pass through 3 and 5 respectively.

Nature of Curves, Types of Graphs, Shapes are explained / discussed at
https://archive.org/details/AreaDefiniteIntegralNatureOfCurvesTypesOfGraphsShapesDiscussi ons

Now let us see graphs of Quadratic functions
Graph of $y=x^{2}$ will be

$$
\text { plot } \quad y=x^{2}
$$

In contrast graph of $y=-3 x^{2}$ will be downwards

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\text { plot } \quad y=-3 x^{2}
$$

Graph of $y=(1 / 3) x^{2}$ will be flatter compared to $y=x^{2}$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Similarly graph of $y=10 x^{2}$ will be narrow and steeper compared to $y=x^{2}$

$$
\text { plot } \begin{aligned}
& y=10 x^{2} \\
& y=x^{2}
\end{aligned}
$$

So see comparisons in a single image

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Similar things happen with power functions as well. Below we see fraction raised to power $x$

Let us see the graph of $\mathrm{y}=2^{\mathrm{x}}$

$$
\text { plot } \quad y=2^{x}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

The graph of $y=3^{x}$ will be steeper and is understood easily by comparison

Now let us compare Integer to the power $x$ and fraction to the power $x$

$$
\begin{array}{|l|l|}
\hline \text { plot } & y=4^{x} \\
y=\left(\frac{1}{5}\right)^{x} \\
\hline
\end{array}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

What about comparing $y=3^{x}$ and $y=-3^{-x}$

Spoon Feeding comparison of $y=2^{x}$ and $y=-2^{x}$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graph of $y=4 x^{2}+3$ will be 3 units above $x$-axis. So will pass through ( 0,3 ) The parabola will look similar to $y=x^{2}$

```
plot y=4\mp@subsup{x}{}{2}+3
```

Let us learn more with graphs of $y=-5 x^{2}+6$ and $y=6 x^{2}-7$

$$
\text { plot } \begin{aligned}
& y=-5 x^{2}+6 \\
& y=6 x^{2}-7
\end{aligned}
$$

Don't quickly assume that the graphs are intersecting on $x$ axis. The roots are very close.
$\left.5 x^{2}=6 \Rightarrow>= \pm \sqrt{(6 / 5)}\right)= \pm 1.095$
While $6 x^{2}=7=>x= \pm \int(7 / 6)= \pm 1.0801$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Concept of Shifting of graphs
The graph of $y=3(x-2)^{2}$ will be same as $y=3 x^{2}$ while shifted by 2 units towards right

$$
\begin{array}{l|l|}
\hline \text { plot } & y=3(x-2)^{2} \\
\hline & y=3 x^{2} \\
\hline
\end{array}
$$

Similarly graph of $y=4(x+3)^{2}$ will be shifted by 3 units on left compared to $y=4 x^{2}$ which is through the origin

$$
\begin{array}{ll}
\text { plot } & y=4(x+3)^{2} \\
y=4 x^{2}
\end{array}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

IIT-JEE 2005 Shifting a Parabola and then finding the area is discussed / explained at
https://archive.org/details/AreaDefiniteIntegrallITJEE2005ShiftingParabolasLeftOrRight

In the above image see how the upper graph is shifted up by 1 due to +1
In the image below the graph is shifted down by -1

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

The parabola that passes through ( 1,0 ) and ( 7,0 ) will be $(x-1)(x-7)$

In simple words the Quadratic expression that has roots 1 and 7 is a parabola through 1 and 7
So graph of $y=(x-1)(x-7)=x^{2}-8 x+7$ is

$$
\text { plot } \quad y=x^{2}-8 x+7
$$

If a Quadratic expression has roots $-3,5$ then it will be a parabola passing through -3 and 5
So graph of $y=(x+3)(x-5)=x^{2}-2 x-15$ is

$$
\text { plot } \quad y=x^{2}-2 x-15
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

If the Discriminant $D<0$ i.e. $b^{2}<4 a c$ then the whole parabola is above $x$-axis signifying imaginary roots. As the parabola does not intersect the $x$-axis at all. For $a>0$

If a is negative then the parabola will be downwards
So graph of $y=(x-3)^{2}+5$ will be

$$
\text { plot } \quad y=(x-3)^{2}+5
$$

Meaning minima will be at $x=3$ so $x^{2}$ graph shifted right by 3 and added 5 so moved up by 5 units

So we can easily guess the graph of $y=-(x+5)^{2}-7 \ldots$.
It will be shifted left by 5 units. So maxima will be at $x=-5$ and 7 units below $x$ axis

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams
(firglot $\quad y=-(x+5)^{2}-7$

The parabola is downwards because coeff of $x^{2}$ is -ve
Don't use the idea of shift blindly! The graph of $y=e^{x-4}$ is not shifted by 4 units that of $y=e^{x}$

$$
\begin{array}{|l|l|}
\hline \text { plot } & y=e^{x} \\
y=e^{x-4}
\end{array}
$$

This is because $e^{(x-4)}=e^{x} / e^{4}$ means just divided by a value

## Concept of Reflections

Guess the graph of $y=-e^{x}$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\text { plot } \quad y=-e^{x}
$$

What about graph of $y=e^{(-x)}$ and $y=-e^{(-x)}$

$$
\begin{array}{ll}
\text { plot } \quad y=-\boldsymbol{e}^{-x} \\
y=\boldsymbol{e}^{-x}
\end{array}
$$

Graph of $y=x \ln x \quad$ ( Ignore the Imaginary part graph )

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

```
plot y = x log(x)
```

Graph of $\mathrm{y}=\mathrm{x} \ln |\mathrm{x}|$

$$
\text { plot } \quad y=x \log (|x|)
$$

How will the graph of $y=(\ln x) / x$ look like ? (Ignore the Imaginary part )

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\text { plot } \quad y=\frac{1}{x} \log (x)
$$

What about graph of $y=(\ln |x|) / x$

$$
\text { plot } \quad y=\frac{1}{x} \log (|x|)
$$

IIT-JEE 1990 problem and Solution on Area, Tricky graph of $x \operatorname{Ln} x$ is explained / Discussed at
https://archive.org/details/AreaDefiniteIntegralIITJEE1990TrickyGraphsOfXLnXAndLnXByX

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

IIT JEE 1984, 1992 Problems and Solutions as being discussed in the class. Explains various kinds of graphs https://archive.org/details/AreaDefiniteIntegrallITJEE19841992TypesOfGraphs

Graph of Floor $x$, i.e. greatest integer function $x, y=[x]$

```
plot y=\lfloorx\rfloor
```

Recall [ -3.2 ] is -4 the integer less than -3.2 while [ -3.99 ] is also -4
What about graph of $y=-[x]$ (i.e. negative of Floor function )

```
plot y= -\lfloorx\rfloor
```

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Best way to learn is to " think " and try to plot it yourself, in rough.
There are many theorems related to " Floor or Greatest Integer functions ". Two theorems related to Floor function are discussed while solving a complicated Limit problem
https://archive.org/details/VeryImportantTwoFloorTheoremsGreatestIntegerFunctionExplana tionAndExample

Fraction $x$ can be defined as $x-[x]$ so graph of $y=\{x\}$ will be

$$
\text { plot } y=x-\lfloor x\rfloor \quad \begin{aligned}
& \{2.3\}=0.3,\{2.4\}=0.4,\{4.5\}=0.5, \\
& \{4.6\}=0.6
\end{aligned}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

There are infinite number of discontinuities.

Graph of $y=\ln (x) \quad$ Note : Log of negative number is imaginary as discussed in the complex number chapter.

Ignore the graph of the imaginary part

Graph of $\mathrm{y}=\ln |\mathrm{x}|$ and $\mathrm{y}=-\ln |\mathrm{x}|$

$$
\begin{array}{l|l}
\text { plot } & y=\log (|x|) \\
& y=-\log (|x|)
\end{array}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graph of $y=\operatorname{Sin} x$ vs $y=\operatorname{Sin}^{-1} x$

$$
\begin{array}{l|l}
\text { plot } & y=\sin (x) \\
y=\sin ^{-1}(x)
\end{array}
$$

Not sure if the above graph communicates well. Imaginary part of the graph to be ignored / avoided as of this discussion.
$y=\operatorname{Sin}^{-1} x$ means $x=\operatorname{Sin} y$ The graph of which is drawn much easier.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\begin{array}{l|l}
\text { plot } & y=\sin (x) \\
& x=\sin (y)
\end{array}
$$

I am sure this is much better
Graph of $y=\operatorname{Cos} x$ vs $y=\operatorname{Cos}^{-1} x$

$$
\begin{array}{l|l}
\text { plot } & y=\cos (x) \\
& x=\cos (y)
\end{array}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graph of $y=\operatorname{Sec} x$ vs $y=\operatorname{Sec}^{-1} x$

plot | $y=\sec (x)$ |
| :--- |
| $x=\sec (y)$ |

I guess we should see these graphs individually as these graphs are not commonly given in other text books

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Actually Cos $x$ can be drawn in the gap to fit-in well

Graph of $y=\operatorname{Cosec} x$

$Y=\operatorname{Sin} x$ has been fit into this

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graph of $y=\tan x$

Graph of $y=\tan ^{-1} x$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Let us compare these a few more times, so that we can remember

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\text { Valentine's Day: } y=|x| \pm \sqrt{ }\left(4-x^{2}\right)
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\text { plot } \quad-2|x-1|+3
$$

Now let us see Horizontal Parabolas
Graph of $y^{2}=4 x$ is of the form $y^{2}=4 a x$

plot | $y^{2}=4 x$ |
| :--- |
| $y^{2}=x-6$ |

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\begin{array}{ll}
\text { plot } & y^{2}=2 x \\
& y^{2}=-x+3
\end{array}
$$

Graphs of Cubic Equations ( $\mathrm{y}=\mathrm{x}$ cube ) and higher powers of x
Graph of $y=x^{3}$ is

$$
\text { plot } \quad y=x^{3}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

A good student can learn a lot by thinking how the graph of negative of the same function will look.

$$
\text { plot } y=-x^{3}
$$

The previous graph flipped around $x$-axis

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

How will $y=(x+6)(x-3)(x-7)$ look like $?[x=-6,3$ and 7 will be roots. So the graph will pass through $(-6,0),(3,0)$ and $(7,0)$

$$
\text { plot } \quad y=(x+6)(x-3)(x-7)
$$

If coeff of $x$ cube is negative then the graph will be downwards for increasing $x$. Also repeat roots can be there. Try to guess the graph of $y=(5-x)(2-x)^{2}$

This will have roots at $x=5$ and repeat roots (Two roots) at $x=2$ so will touch $x$ axis at $x=2$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\text { plot } \quad y=(5-x)(2-x)^{2}
$$

Because of distorted scale this graph is not a good one. The graph is correct but student must be mature to understand the distorted scale effects.

The graph below is a better one from a different plotter

The graph of $\mathrm{y}=\mathrm{x}^{5}$ or say $\mathrm{y}=\mathrm{x}^{11}$ will look very similar

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\text { plot } \quad y=x^{5}
$$

$$
\text { plot } \quad y=x^{11}
$$

The difference is highlighted if the graphs are drawn together. All these graphs pass through ( 1,1 ) and ( $-1,-1$ ). While higher powered graph is flatter in between -1 to 1 and steeper after 1 or before -1

$$
\begin{array}{|l|l|}
\hline \text { plot } & y=x^{3} \\
y=x^{5} \\
\hline
\end{array}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graph of $y=x^{2}(x+3)(x-3)=x^{2}\left(x^{2}-9\right)$

$$
\text { plot } \quad y=x^{2}\left(x^{2}-9\right)
$$

$X=0$ will be repeat root due to $x$ square. Also $x=3$ and $x=-3$ will be the roots
Graph of $y=-x^{2}\left(x^{2}-9\right)+6$

$$
\text { plot } \quad y=6-x^{2}\left(x^{2}-9\right)
$$

Now let us see graphs of Circles
Graph of $x^{2}+y^{2}=R^{2}$ will have the center at ( 0,0 ) and radius will be $R$
So graph of $x^{2}+y^{2}=36$ is

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

```
plot }\quad\mp@subsup{x}{}{2}+\mp@subsup{y}{}{2}=3
```

Graph of $(x-3)^{2}+(y-4)^{2}=25$ is

$$
\text { plot } \quad(x-3)^{2}+(y-4)^{2}=25
$$

Center is at (3, 4)

## Some special graphs

$$
\text { plot } \quad y=\frac{x}{x^{2}+1}
$$

The graph become asymptotic to $x$-axis as we move towards right or left

The same will happen for $y=\frac{x^{2}}{x^{2}+1}$ though very slowly $\quad \lim _{x \rightarrow \pm \infty} \frac{x^{2}}{1+x^{2}}=1$

$$
\text { plot } \quad y=\frac{x^{2}}{x^{2}+1}
$$

In this case the graph is asymptotic to $1 \quad\left(\begin{array}{l}\left.y=\frac{x^{2}}{x^{2}+1} \quad\right), ~(n)\end{array}\right.$
CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Can you guess what will happen in case of $\quad y=\frac{x^{2}}{x^{3}+2} \quad$ ? Did you notice the discontinuity around negative cuberoot of 2

$$
\text { plot } \quad y=\frac{x^{2}}{x^{3}+2}
$$

## CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses

& 9 x^{5} / x^{5}+7 x^{2} / x^{5}
\end{aligned}
$$

There are no oblique asymptotes, as the degree of the numerator is not one greater than the degree of the denominator

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Find all asymptotes and sketch the function

$$
\begin{aligned}
& x^{4}-3 x^{3}+5 x^{2}-7 x+9 \\
& y=\begin{aligned}
& ------------------------18 \\
& x^{5}-x^{4}-x^{3}+3 x^{2}-5 x+18
\end{aligned}
\end{aligned}
$$

First, reduce the equation to $y=1 /(x+2)$
$x+2=0$
$x=-2$ (one vertical asymptote)

1/x
$y=--------=0$ (one horizontal asymptote)
$x / x+2 / x$
There are no oblique asymptotes, as the degree of the numerator is not one greater than the degree of the denominator

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graphs of $y=x+1 / x$ and $y=x-1 / x$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graph of $y=\frac{1}{2}\left(e^{x^{2}}+e^{-x^{2}}\right)$

$$
\text { plot } \quad y=\frac{1}{2}\left(e^{x^{2}}+e^{-x^{2}}\right)
$$

So graph of

$$
y=\frac{1}{\boldsymbol{e}^{x^{2}}+\boldsymbol{e}^{-x^{2}}}
$$

plot

$$
y=\frac{1}{\boldsymbol{e}^{x^{2}}+\boldsymbol{e}^{-x^{2}}}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Draw graphs of $y^{2} \leq 8 x, x^{2}+y^{2} \leq 9$

Graphs of $x^{2}+y^{2}=16$, and $y^{2}=6 x$

The graph will be

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graphs of $x^{2}+y^{2}=4$, and $(x-2)^{2}+y^{2}=4$

$$
\begin{array}{ll}
\text { plot } & x^{2}+y^{2}=4 \\
& (x-2)^{2}+y^{2}=4
\end{array}
$$

Equation (1) is a circle with centre $O$ at eh origin and radius 2. Equation (2) is a circle with centre $C(2,0)$ and radius 2 . Solving equations (1) and (2), we have

$$
(x-2)^{2}+y^{2}=x^{2}+y^{2}
$$

Or $\quad x^{2}-4 x+4+y^{2}=x^{2}+y^{2}$
Or $\quad x=1$ which gives $y \pm \sqrt{3}$
Thus, the points of intersection of the given circles are $A(1, \sqrt{3})$ and $A^{\prime}(1,-\sqrt{3})$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Graphs of $y^{2}=x$ and $x+y=2$

Equation (1) represents a parabola with vertex at origin and its axis as 8 -axis, equation (2) represents a line passing through $(2,0)$ and $(0,2)$, points of intersection of line and parabola are $(1,1)$ and $(4,-2)$.

A rough sketch of curves is as below:-

Graphs of $x=-2, x=3$, $x$-axis $(y=0)$, and $y=1+|x+1|$
The straight lines for the mod function will flip around $x=-1$

$$
\text { plot } y=1+|x+1|
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

So, equation (1) is a straight line that passes through $(0,2)$ and $(-1,1)$. Equation $(2)$ is a line passing through $(-1,1)$ and $(-2,2)$ and it is enclosed by line $x=2$ and $x=3$ which are lines parallel to $y$-axis and pass through $(2,0)$ and $(3,0)$ respectively $y=0$ is $x$-axis. So, a rough sketch of the curves is given as:-

Shaded region represents the required area.

Draw $0<x<1$ for $y=|x-5|$
The graph of the modulus function will flip around $x=5$

$$
\text { plot } \quad y=|x-5|
$$

\end{aligned}
$$

## Function

A function is a relation for which there is only one value of $y$ corresponding to any value of $x$. We sometimes write $y=f(x)$, which is notation meaning ' $y$ is a function of $x$ '.

Some very common mathematical constructions are not functions. For example, consider the relation $x^{2}+y^{2}=4$ because multiple values can satisfy the equation. Ay put $y=0$, then for $x$ $=2$ and $x=-2$ both the expression is 4

There is a simple test to check if a relation is a function, by looking at its graph. This test is called the
vertical line test. If it is possible to draw any vertical line (a line of constant $x$ ) which crosses the graph of the relation more than once, then the relation is not a function. If more than one intersection point exists, then the intersections correspond to multiple values of $y$ for $a$ single value of $x$.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses
Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams
An inverse function is a function which "does the reverse" of a given function. More formally, if $f$ is a function with domain $X$, then $f^{-1}$ is its inverse function if and only if for every $x \varepsilon X$ we have

$$
f^{-1}(f(x))=\mathbf{x}
$$

A simple way to think about this is that a function, say $y=f(x)$, gives you a y-value if you substitute an
$x$-value into $f(x)$. The inverse function tells you tells you which $x$-value was used to get a particular $y$-valuewhen you substitue the $y$-value into $f^{-1}(x)$.

If $f(x)=3 x+2$ then find $f^{-1}(x)$
Solution :
Put $y=3 x+2$ and solve for $x \Rightarrow y-2=3 x$ or $x=(y-2) / 3$
Now exchange $x$ and $y$
So $f^{-1}(x)=(x-2) / 3$

We say that a function $g(x)$ is periodic if there is a positive or negative number $T$ for which $g(x+T)=g(x)$ for all $x \quad$ We call $T$ a period of $g(x)$

A periodic function has many periods
Since the graph of $g$ repeats after $x$ increases by $T$, it also repeats after $x$ increases by $2 T$, or $-3 T$, or any integer multiple (positive or negative) of $T$. This means that a periodic function always has many periods. (That's why the definition refers to "a period" rather than "the period.")

The period of a periodic function is its smallest positive period. It is the size of a single cycle.
If the function $g(x)$ is periodic, then its frequency is the number of cycles per unit $x$.
In general, if $f$ is the frequency of a periodic function $g(x)$ and $T$ is its period, then we have

$$
f=\frac{1}{T} \quad \text { and } \quad T=\frac{1}{f}
$$

if the period is measured in seconds, then the frequency is measured in cycles per second.
The term Hertz is a special unit used to measure time frequencies; it equals one cycle per second. Hertz is abbreviated Hz; thus a kilohertz ( kHz ) and a megahertz ( MHz ) are 1,000 and $1,000,000$ cycles per second, respectively. This unit is commonly used to describe sound, light, radio, and television waves.

Circular functions. While there are innumerable examples of periodic functions, two in particular are considered basic: the sine and the cosine. They are called circular functions

## CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses

 Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other examsbecause they are defined by means of a circle. To be specific, take the circle of radius 1 centered at the origin in the $x$, $y$-plane. Given any real number $t$, measure a distance of $t$ units around the circumference of the circle.

Start on the positive $x$-axis, and measure counterclockwise if $t$ is positive, clockwise if $t$ is negative. The coordinates of the point you reach this way are, by definition, the cosine and the sine functions of $t$, respectively:
$x=\cos (t)$
$y=\sin (t)$
The whole circumference of the circle measures $2 \pi$ units. Therefore, if we add $2 \pi$ units to the $t$ units we have already measured, we will arrive back at the same point on the circle. That is, we get to the same point on the circle by measuring either $t$ or $t+2 \pi$ units around the circumference. We can describe the coordinates of this point two ways:
$(\cos (t), \sin (t))$ or $(\cos (t+2 \pi), \sin (t+2 \pi))$
Thus
$\cos (t+2 \pi)=\cos (t) \sin (t+2 \pi)=\sin (t)$,
so $\cos (\mathrm{t})$ and $\sin (\mathrm{t})$ are both periodic, and they have the same period, $2 \pi$.
Here are their graphs. By reading their slopes we can see $(\sin t)^{\prime}=\cos t$ and $(\cos t)^{\prime}=-\sin t$

While graph of $y=\sin (4 t)$ will be

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\bigcap_{-\pi}^{y=\sin (4 t)} y_{4}^{y}
$$

Their scales are identical, so it is clear that the frequency of $\sin (4 t)$ is four times the frequency of $\sin (\mathrm{t})$. The general pattern is described in the following table.

| function | period | frequency |  |
| :---: | :---: | :---: | :---: |
| $\sin (t)$ | $\cos (t)$ | $2 \pi$ | $1 / 2 \pi$ |
| $\sin (4 t)$ | $\cos (4 t)$ | $2 \pi / 4$ | $4 / 2 \pi$ |
| $\sin (b t)$ | $\cos (b t)$ | $2 \pi / b$ | $b / 2 \pi$ |

Notice that it is the frequency-not the period-that is increased by a factor of $b$ when we multiply the input variable by b.

Constructing a circular function with a given frequency
By using the information in the table, we can circular functions with any period or frequency whatsoever. For instance, suppose we wanted a cosine function $x=\cos (b t)$ with a frequency
of 5 cycles per unit $t$. This means $5=$ frequency $=\frac{b}{2 \pi}$
which implies that we should set $b=10 \pi$ and $x=\cos (10 \pi t)$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses
Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams
Domain and Range of functions (graphs )
In simple words - Given a function, the values of $x$ that are allowed to be supplied to the function, so that all terms remain real, is the domain. So Domain is the values for $x$ as it varies.

Range are the values $y=f(x)$ takes, keeping the function as Real. So Range is the way $y$ varies.

Consider the parabola $y=f(x)=3 x^{2}+4$
The graph will be

$$
\text { plot } \quad y=3 x^{2}+4
$$

We see that y is minimum 5 or more. So Range is [5, $\infty$ ) while Domain is $(-\infty, \infty)$ or $]-\infty$, $\infty$ [

Note : the round brackets ( or ) means open bracket. Meaning close to that value but not equal to.
$\infty$ is always written with open bracket " ) " as we can have a very high value, but exactly infinity is undefined. Other way of writing the same thing is $5 \leq y<\infty$

Thus the $\leq$ sign is giving the symbol " [ "
In some statement if we get $6<y<9$ then same thing will be written as $(6,9)$
But $1 \leq y \leq 8$ will be $[1,8]$
For the above problem for all values ( positive, negative, zero ) of $x$ the graph exists. So $-\infty<$ $x<\infty$ watch the $\leq$ sign is not being used for infinity.

Now some Mathematicians take pleasure in writing the same thing as $]-\infty, \infty[$ as this is easier to print.

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Spoon Feeding : Find Domain and Range for $x=6 y^{2}+7$ and write the answer in all methods Graph will be

```
plot 6 y }=x-
```

So Domain is : $7 \leq x$ or $7 \leq x<\infty \quad$ or $[7, \infty)$ or $[7, \infty[$

And Range is : $]-\infty, \infty$ or $(-\infty, \infty)$ or $-\infty<y<\infty$

Spoon Feeding : One of the most favorite questions by Math teachers, of standard 11 is to ask Domain and Range of $y=f(x)=\sqrt{\frac{9-x}{x-1}}$

Let me try to solve this without drawing the graph. If the student can guess the graph, ofcourse it becomes very easy to solve.

If $x$ becomes more than 9 then Numerator $(N)$ becomes negative while Denominator ( $D$ ) remains positive. As imaginary value of y is not allowed, x has to be less than or equal to 9 so $\mathrm{x} \leq 9$
$N$ can be zero, but $D$ is not allowed to be zero as dividing by 0 is not defined. So $x=1$ is not allowed. If $x<1$ then the $N$ remain +ve but $D$ becomes -ve. As $y$ cannot be imaginary, $1<x$, meaning $x$ has to be greater than 1 . But $x$ can be arbitrarily close to 1 say $1+\delta$ where $\delta$ is very small positive number. In that case $D$ becomes $\delta$ while $N=9-(1+\delta)=8-\delta$
$(8-\delta) / \delta$ tends to $\infty$ So Range for $y$ will go upwards to infinity. But what will be the least value?

We already saw that N can be zero ( 0 ) but not negative. So Range will be from 0 to infinity.
Now let us see the graph

$$
\text { plot } y=\sqrt{\frac{9-x}{x-1}}
$$

Ignore the red lines of imaginary solutions.
Let us write the Solutions
Domain : $1<x \leq 9$ or $(1,9]$ or $] 1,9]$
Happy?
Range : $0 \leq y<\infty$ or $[0, \infty)$ or $[0, \infty$ [

Spoon Feeding : Find Domain and Range of $y=f(x)=\sqrt{\frac{8-x}{1-x}}$
If $x$ is in between 1 and 8 , say 6 then $N$ is +ve while $D$ is -ve, which is not allowed.
If $x$ is greater than $8(8<x)$ then both $N$ and $D$ are negative so fine for us, as $y$ the function is real. If $x$ is less than 1 say 0 or -100 then also $y$ is real. As both $N$, and $D$ is positive.

We need to analyze the function when $x$ is very close to 1 i.e. $x=1-\delta$ where $\delta$ is very small positive number. $D$ becomes $1-(1-\delta)=\delta$

Positive D divided by $\delta$ will tend to infinity.
Now we can write the Domain : $8 \leq x$ or $x<1$

While Range : $0 \leq y<\infty$ or $[0, \infty)$ or $[0, \infty$ [

Let us confirm by drawing the graph. ( Though in the exam you have to just guess the graph )

Solve the equation $2 x^{2}+x+1=0$
Answer
The given quadratic equation is $2 x^{2}+x+1=0$
On comparing the given equation with $a x^{2}+b x+c=0$, we obtain $a=2, b=1$, and $c=1$

Therefore, the discriminant of the given equation is
$D=b^{2}-4 a c=1^{2}-4 \times 2 \times 1=1-8=-7$
Therefore, the required solutions are

$$
\frac{-b \pm \sqrt{\mathrm{D}}}{2 a}=\frac{-1 \pm \sqrt{-7}}{2 \times 2}=\frac{-1 \pm \sqrt{7} i}{4} \quad[\sqrt{-1}=i]
$$

Solve the equation $x^{2}+3 x+9=0$

## Answer

The given quadratic equation is $x^{2}+3 x+9=0$
On comparing the given equation with $a x^{2}+b x+c=0$, we obtain $a=1, b=3$, and $c=9$

Therefore, the discriminant of the given equation is

$$
D=b^{2}-4 a c=3^{2}-4 \times 1 \times 9=9-36=-27
$$

Therefore, the required solutions are

$$
\frac{-b \pm \sqrt{\mathrm{D}}}{2 a}=\frac{-3 \pm \sqrt{-27}}{2(1)}=\frac{-3 \pm 3 \sqrt{-3}}{2}=\frac{-3 \pm 3 \sqrt{3} i}{2}
$$

$$

$$

Now, completing the squares, we get

$$
\begin{aligned}
& (2 x-3)^{2}+16=0 \\
\Rightarrow & (2 x-3)^{2}-4 i^{2}=0 \\
\Rightarrow & (2 x-3+4 i)(2 x-3-4 i)=0 \\
\Rightarrow & (2 x-3+4 i)=0 \quad \text { or } \quad(2 x-3-4 i)=0 \\
\therefore & x=\frac{3}{2}+2 i, \quad \frac{3}{2}-2 i
\end{aligned}
$$

## Question

$$
x^{2}+x+1=0
$$

Now, completing the squares, we get

$$
\begin{aligned}
& \left(x+\frac{1}{2}\right)^{2}+\frac{3}{4}=0 \\
\Rightarrow & \left(x+\frac{1}{2}\right)^{2}-\left(\frac{\sqrt{3}}{2} i\right)^{2}=0 \\
\Rightarrow & \left(x+\frac{1}{2}+\frac{\sqrt{3}}{2} i\right)\left(x+\frac{1}{2}-\frac{\sqrt{3}}{2} i\right)=0 \\
\Rightarrow & \left(x+\frac{1}{2}+\frac{\sqrt{3}}{2} i\right)=0 \quad \text { or } \quad\left(x+\frac{1}{2}-\frac{\sqrt{3}}{2} i\right)=0 \\
\therefore & x=\frac{-1}{2}+\frac{\sqrt{3}}{2} i, \quad \frac{-1}{2}-\frac{\sqrt{3}}{2} i
\end{aligned}
$$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\begin{aligned}
& \quad 4 x^{2}+1=0 \\
& \Rightarrow \quad(2 x)^{2}-i^{2}=0 \quad\left[\because i^{2}=-1\right] \\
& \Rightarrow \quad(2 x+i)(2 x-i)=0 \\
& \Rightarrow \\
& \text { either } 2 x+i=0 \quad \text { or } 2 x-i=0 \\
& \Rightarrow \quad \\
& x=\frac{-i}{2} \quad \text { or } x=\frac{i}{2} \\
& \therefore \\
& x=\frac{-i}{2}, \frac{i}{2}
\end{aligned}
$$

## Question

$$
x^{2}-4 x+7=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c=(-4)^{2}-4.1 .7=-12$
from (A)

$$
\begin{aligned}
x & =-\frac{(-4) \pm \sqrt{-12}}{2} \\
& =\frac{4 \pm 2 \sqrt{3} i}{2} \\
& =2 \pm \sqrt{3} i \\
\therefore \quad x=2 & +\sqrt{3} i, 2-\sqrt{3} i
\end{aligned}
$$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
x^{2}+2 x+2=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c$
$=2^{2}-4.1 .2$
$=4-8$
$=-4$
from (A)

$$
\begin{aligned}
& x=\frac{-2 \pm \sqrt{-4}}{2} \\
&=\frac{-2 \pm 2 i}{2} \\
&=-1 \pm i \\
& \therefore \quad x=-1+i, \quad-1-i
\end{aligned}
$$

Question

$$
5 x^{2}-6 x+2=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a}
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(-6)^{2}-4 \cdot 5 \cdot 2 \\
& =36-40 \\
& =-4
\end{aligned}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams
from (A)

$$
\begin{aligned}
x & =\frac{-(-6) \pm \sqrt{-4}}{2.5} \\
& =\frac{6 \pm 2 i}{10} \\
& =\frac{3 \pm i}{5} \\
\therefore \quad x=\frac{3}{5} & +\frac{i}{5}, \quad \frac{3}{5}-\frac{i}{5}
\end{aligned}
$$

## Question Solve

$$
21 x^{2}+9 x+1=0
$$

Comparing the given equation with the general form

$$
a x^{2}+b x+c=0 \text {, we get } a=21, b=9, c=1
$$

Substituting a and b in,
$\alpha=\frac{-b+\sqrt{b^{2}-4 a c}}{2 a}$ and $\beta=\frac{-b-\sqrt{b^{2}-4 a c}}{2 a}$
$\alpha=\frac{-9+\sqrt{81-84}}{42}$ and $\beta=\frac{-9-\sqrt{81-84}}{42}$
$\Rightarrow \alpha=\frac{-9+\sqrt{-3}}{42}$ and $\beta=\frac{-9-\sqrt{-3}}{42}$
$\Rightarrow \alpha=\frac{-9+i \sqrt{3}}{42}$ and $\beta=\frac{-9-i \sqrt{3}}{42}$
The roots are $x=\frac{-9}{42} \pm \frac{i \sqrt{3}}{42}$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
x^{2}-x+1=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a}, \ldots \ldots \ldots(A)
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(-1)^{2}-4.1 .1 \\
& =1-4 \\
& =-3
\end{aligned}
$$

from (A)

$$
\begin{aligned}
\therefore \quad & =\frac{-(-1) \pm \sqrt{-3}}{2} \\
& =\frac{1 \pm \sqrt{3} i}{2}
\end{aligned}
$$

$\therefore \quad x=\frac{1}{2}+\frac{\sqrt{3}}{2} i, \quad \frac{1}{2}-\frac{\sqrt{3}}{2} i$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
x^{2}+x+1=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

$$
\text { where } \begin{aligned}
D & =b^{2}-4 a c \\
& =1^{2}-4 \cdot 1 \cdot 1 \\
& =1-4 \\
& =-3
\end{aligned}
$$

from (A)

$$
\begin{aligned}
& x=\frac{-1 \pm \sqrt{-3}}{2} \\
&=\frac{-1 \pm \sqrt{3} i}{2} \\
& \therefore \quad x=\frac{-1}{2}+\frac{\sqrt{3}}{2} i, \quad \frac{-1}{2}-\frac{\sqrt{3}}{2} i
\end{aligned}
$$

## Question

$$
17 x^{2}-8 x+1=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(-8)^{2}-4 \cdot 17 \cdot 1 \\
& =64-68 \\
& =-4
\end{aligned}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\begin{aligned}
& \text { from (A) } \\
& \qquad \begin{aligned}
& x=\frac{-(-8) \pm \sqrt{-4}}{2.17} \\
&=\frac{8 \pm 2 i}{34} \\
&=\frac{4 \pm i}{17} \\
& \therefore x=\frac{4}{17}+\frac{i}{17}, \quad \frac{4}{17}-\frac{i}{17}
\end{aligned}
\end{aligned}
$$

Question

$$
27 x^{2}-10 x+1=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \ldots \ldots \ldots \cdots \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c$
$=(-10)^{2}-4.27 .1$
$=100-108$
$=-8$
from (A)

$$
\begin{aligned}
x & =\frac{-(-10) \pm \sqrt{-8}}{54} \\
& =\frac{10 \pm 2 \sqrt{2} i}{54} \\
& =\frac{5 \pm \sqrt{2} i}{27}
\end{aligned}
$$

$\therefore \quad x=\frac{5}{27}+\frac{\sqrt{2} i}{27}, \quad \frac{5}{27}-\frac{\sqrt{2}}{27} i$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

Question

$$
17 x^{2}+28 x+12=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a} \ldots \ldots \ldots(A)
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(28)^{2}-4.17 .12 \\
& =784-816 \\
& =-32
\end{aligned}
$$

from (A)

$$
\begin{array}{r}
x=\frac{-28 \pm \sqrt{-32}}{2.17} \\
=\frac{-28 \pm 4 \sqrt{2}}{34} \\
\therefore \quad x=\frac{-14 \pm 2 \sqrt{2}}{17}
\end{array}
$$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
21 x^{2}-28 x+10=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a}, \ldots \ldots \ldots(A)
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(-28)^{2}-4.21 \cdot 10 \\
& =784-840 \\
& =-56
\end{aligned}
$$

from (A)

$$
\begin{aligned}
x & =\frac{-(-28) \pm \sqrt{-56}}{2.21} \\
& =\frac{28 \pm 2 \sqrt{14 i}}{42}
\end{aligned}
$$

$\therefore \quad x=\frac{2}{3} \pm \frac{\sqrt{14}}{21}$;
Question

$$
8 x^{2}-9 x+3=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a} \cdots \cdots \cdots \cdots(A)
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(-9)^{2}-4 \cdot 8 \cdot 3 \\
& =81-96 \\
& =-15
\end{aligned}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams
from (A)

$$
\begin{aligned}
x & =\frac{-b \pm \sqrt{D}}{2 a} \\
& =\frac{-(-9) \pm \sqrt{-15}}{2.8} \\
& =\frac{9 \pm \sqrt{15} i}{16}
\end{aligned}
$$

Thus
$\therefore \quad x=\frac{9 \pm \sqrt{15} i}{16}$
Question

$$
13 x^{2}+7 x+1=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a}, \ldots \ldots \ldots(A)
$$

where $D=b^{2}-4 a c$
$=7^{2}-4.13 .1$
$=49-52$
$=-3$

Thus, from (A)

$$
\begin{aligned}
x & =\frac{-7 \pm \sqrt{-3}}{2 \cdot 13} \\
& =\frac{-7 \pm \sqrt{3} i}{26}
\end{aligned}
$$

Thus

$$
\therefore \quad x=\frac{-7}{26} \pm \frac{\sqrt{3}}{26} i
$$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
2 x^{2}+x+1=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a} \cdots \cdots \cdots \cdots(A)
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =1^{2}-4 \cdot 2 \cdot 1 \\
& =1-8 \\
& =-7
\end{aligned}
$$

Thus, from (A)

$$
\begin{aligned}
x & =\frac{-1 \pm \sqrt{-7}}{2 \cdot 2} \\
& =\frac{-1 \pm \sqrt{7 i}}{4}
\end{aligned}
$$

Thus
$\therefore \quad x=\frac{-1}{4} \pm \frac{\sqrt{7}}{4} i$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\sqrt{3} x^{2}-\sqrt{2} x+3 \sqrt{3}=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c$
$=(-\sqrt{2})^{2}-4 \cdot \sqrt{3} \cdot 3 \sqrt{3}$
$=2-36$

$$
=-34
$$

from (A)

$$
\begin{aligned}
x & =\frac{-(-\sqrt{2}) \pm \sqrt{-34}}{2 \cdot \sqrt{3}} \\
& =\frac{\sqrt{2} \pm \sqrt{34} i}{2 \sqrt{3}}
\end{aligned}
$$

Thus
$\therefore \quad x=\frac{\sqrt{2} \pm \sqrt{34} i}{2 \sqrt{3}}$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\sqrt{2} x^{2}+x+\sqrt{2}=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \ldots \ldots \ldots \ldots \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c$
$=1^{2}-4 \cdot \sqrt{2} \cdot \sqrt{2}$
$=1-8$
$=-7$
from (A)

$$
\begin{aligned}
x & =\frac{-1 \pm \sqrt{-7}}{2 \cdot \sqrt{2}} \\
& =\frac{-1 \pm \sqrt{7 i}}{2 \sqrt{2}}
\end{aligned}
$$

Thus
$\therefore \quad x=\frac{-1 \pm \sqrt{7} i}{2 \sqrt{2}}$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
x^{2}+x+\frac{1}{\sqrt{2}}=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =1^{2}-4 \cdot 1 \frac{1}{\sqrt{2}} \\
& =1-2 \sqrt{2}
\end{aligned}
$$

from (A)

$$
\begin{aligned}
x & =\frac{-1 \pm \sqrt{-(2 \sqrt{2}-1)}}{2} \\
& =\frac{-1 \pm \sqrt{2 \sqrt{2}-1} i}{2}
\end{aligned}
$$

Thus,

$$
\therefore \quad x=\frac{-1 \pm \sqrt{2 \sqrt{2}-1 i}}{2}
$$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
x^{2}+\frac{x}{\sqrt{2}}+1=0 \quad \Rightarrow \quad \sqrt{2} x^{2}+x+\sqrt{2}=0
$$

We will apply discriminant rule,

$$
\begin{aligned}
x & =\frac{-b \pm \sqrt{D}}{2 a} \cdots \cdots \cdots \cdots(A) \\
D & =b^{2}-4 a c \\
& =1^{2}-4 \cdot \sqrt{2} \cdot \sqrt{2} \\
& =1-8 \\
& =-7
\end{aligned}
$$

from (A)

$$
\begin{aligned}
x & =\frac{-1 \pm \sqrt{-7}}{2 \sqrt{2}} \\
& =\frac{-1 \pm \sqrt{7} i}{2 \sqrt{2}}
\end{aligned}
$$

Thus,
$\therefore \quad x=\frac{-1 \pm \sqrt{7} i}{2 \sqrt{2}}$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
\sqrt{5} x^{2}+x+\sqrt{5}=0
$$

We will apply discriminant rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \ldots \ldots \ldots \ldots \tag{A}
\end{equation*}
$$

where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =1^{2}-4 \cdot \sqrt{5} \cdot \sqrt{5} \\
& =1-20 \\
& =-19
\end{aligned}
$$

from (A)

$$
\begin{aligned}
x & =\frac{-1 \pm \sqrt{-19}}{2 \cdot \sqrt{5}} \\
& =\frac{-1 \pm \sqrt{19} i}{2 \sqrt{5}}
\end{aligned}
$$

Thus,
$\therefore \quad x=\frac{-1 \pm \sqrt{19} i}{2 \sqrt{5}}$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

$$
-x^{2}+x-2=0
$$

We will apply discriminant rule,

$$
x=\frac{-b \pm \sqrt{D}}{2 a} \ldots \ldots \ldots \ldots(A
$$

where $D=b^{2}-4 a c$

$$
=1^{2}-4 \cdot(-1) \cdot(-2)
$$

$$
=1-8
$$

$$
=-7
$$

from (A)

$$
\begin{aligned}
x & =\frac{-1 \pm \sqrt{-7}}{2 \cdot(-1)} \\
& =\frac{-1 \pm \sqrt{7 i}}{-2}
\end{aligned}
$$

Thus,
$\therefore \quad x=\frac{-1 \pm \sqrt{7} i}{-2}$

## Question

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

We will apply discriminate rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

Where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(-2)^{2}-4(1)\left(\frac{3}{2}\right) \\
& =4-6 \\
& =-2
\end{aligned}
$$

From (A)

$$
\begin{aligned}
x & =\frac{-(-2) \pm \sqrt{-2}}{2(1)} \\
& =\frac{2 \pm i \sqrt{2}}{2} \\
& =1 \pm \frac{i}{\sqrt{2}}
\end{aligned}
$$

Thus,

$$
\therefore x=1 \pm \frac{i}{\sqrt{2}}
$$

## Question

We will apply discriminate rule,

$$
\begin{equation*}
x=\frac{-b \pm \sqrt{D}}{2 a} \tag{A}
\end{equation*}
$$

Where $D=b^{2}-4 a c$

$$
\begin{aligned}
& =(-4)^{2}-4(3)\left(\frac{20}{3}\right) \\
& =16-80 \\
& =-64
\end{aligned}
$$

From (A)

$$
\begin{aligned}
x & =\frac{-(-4) \pm \sqrt{-64}}{2(3)} \\
& =\frac{4 \pm i 8}{6} \\
& =\frac{2}{3} \pm \frac{4 i}{3}
\end{aligned}
$$

Thus,

$$
\therefore x=\frac{2}{3} \pm \frac{4 i}{3}
$$

CBSE Math Survival Guide - Quadratic Equation by Prof. Subhashish Chattopadhyay SKMClasses Bangalore Useful for IIT-JEE, I.Sc. PU-II, Boards, IGCSE IB AP-Mathematics and other exams

## To recall standard integrals

Some series Expansions -
$\frac{\pi}{2}=\left(\frac{2}{1} \frac{2}{3}\right)\left(\frac{4}{3} \frac{4}{5}\right)\left(\frac{6}{5} \frac{6}{7}\right)\left(\frac{8}{7} \frac{8}{9}\right) \ldots$
$\pi=\frac{4}{1}-\frac{4}{3}+\frac{4}{5}-\frac{4}{7}+\frac{4}{9}-\frac{4}{11}+\frac{4}{13}-\cdots$
$\frac{\pi}{4}=\frac{1}{1}-\frac{1}{3}+\frac{1}{5}-\frac{1}{7}+\frac{1}{9}-\cdots$
$\pi=\sqrt{12}\left(1-\frac{1}{3 \cdot 3}+\frac{1}{5 \cdot 3^{2}}-\frac{1}{7 \cdot 3^{3}}+\cdots\right)$
$\frac{\pi^{2}}{6}=\frac{1}{1^{2}}+\frac{1}{2^{2}}+\frac{1}{3^{2}}+\frac{1}{4^{2}}+\ldots .=\sum_{n=1}^{\infty} \frac{1}{n^{2}}$
$\int_{0}^{\pi / 2} \log \sin x d x=-\frac{\pi}{2} \log 2=\frac{\pi}{2} \log \frac{1}{2}$

## Solve a series problem

$$
\text { If } \frac{1}{1^{2}}+\frac{1}{2^{2}}+\frac{1}{3^{2}}+\cdots \text { upto } \infty=\frac{\pi^{2}}{6}, \text { then value of }
$$

$$
\frac{1}{1^{2}}+\frac{1}{3^{2}}+\frac{1}{5^{2}}+\cdots \text { up to } \infty \text { is }
$$

(a) $\frac{\pi^{2}}{4}$
(b) $\frac{\pi^{2}}{6}$
(c) $\frac{\pi^{2}}{8}$
(d) $\frac{\pi^{2}}{12}$

Ans. (c)
Solution We have $\frac{1}{1^{2}}+\frac{1}{3^{2}}+\frac{1}{5^{2}}+\cdots$ upto $\infty$

$$
\begin{aligned}
& =\frac{1}{1^{2}}+\frac{1}{2^{2}}+\frac{1}{3^{2}}+\frac{1}{4^{2}}+\frac{1}{5^{2}}+\frac{1}{6^{2}} \cdots \text { upto } \infty \\
& \\
& -\frac{1}{2^{2}}\left[1+\frac{1}{2^{2}}+\frac{1}{3^{2}}+\cdots\right] \\
& = \\
& \frac{\pi^{2}}{6}-\frac{1}{4}\left(\frac{\pi^{2}}{6}\right)=\frac{\pi^{2}}{8} \\
& 1-\frac{1}{2^{2}}+\frac{1}{3^{2}}-\frac{1}{4^{2}}+\frac{1}{5^{2}}-\frac{1}{6^{2}}+\ldots \infty=\frac{\pi^{2}}{12} \\
& \frac{1}{2^{2}}+\frac{1}{4^{2}}+\frac{1}{6^{2}}+\ldots \infty=\frac{\pi^{2}}{24}
\end{aligned}
$$
